Photo Q Standard

Photo Q Dual

Photo Q Mini

Photo Q Pop-up

Photo Q Exclusive Booth

etc

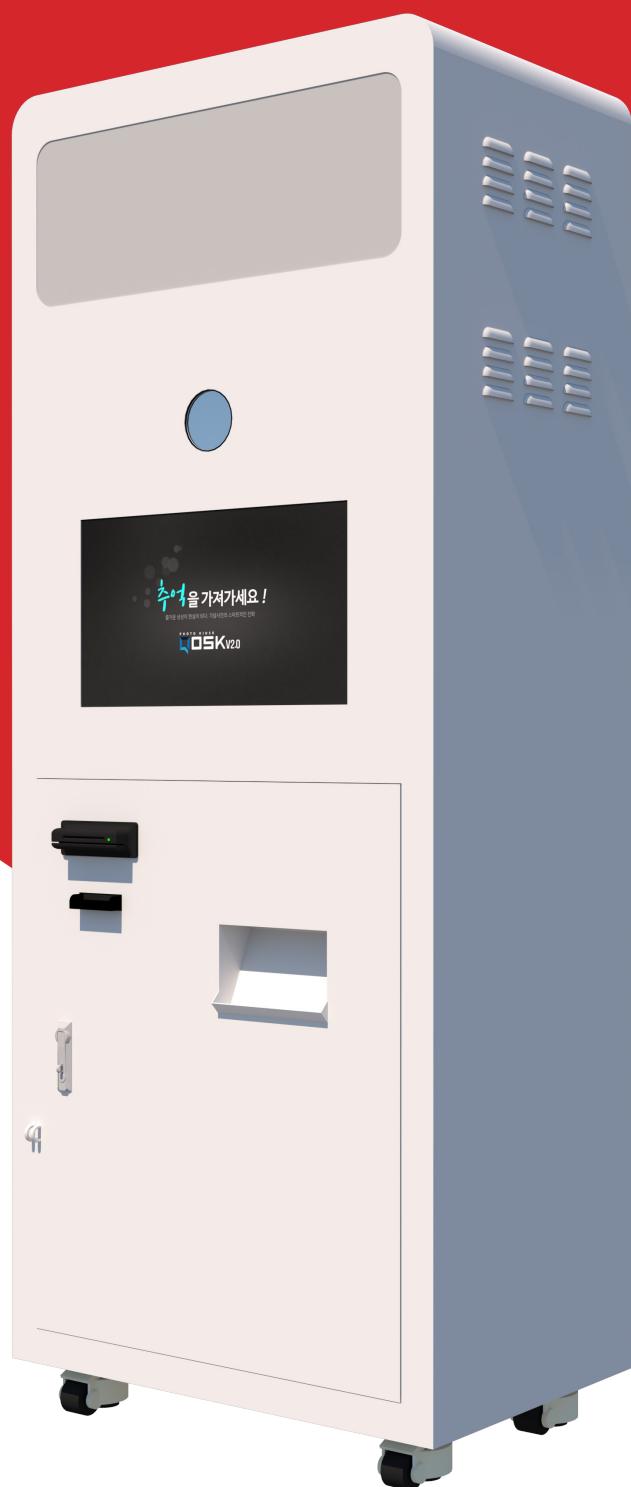

PHOTO Q STANDARD

The Photo Q Stand is an unmanned photo kiosk that allows users to operate the camera via touchscreen or remote control

It is easy to install and move, allowing use without spatial limitations. The strobe angles can be adjusted according to the environment for optimal shooting results, and after taking photos, users can instantly select and print their favorite shots or save both images and videos to their smartphones via QR code

TYPE Standard Model A, B

Key Features

Designed for overhead shooting, with fully adjustable strobe angles for optimal results

Standard A

Standard A

Standard B

Specifications

Category	Item	Components	Model/Specification
PC	CPU	Intel Core i5 - i7	
	RAM	16GB	
	SSD	250GB+	
Camera	Body	CANON	
	Lens	CANON 18-55mm (Optional 10-18mm)	
Lighting	Strobe & Others	Instant flash, continuous light	
H/W	Monitor	24"(Main)	24" capacitive touch monitor (Touch)
	Power Control	I/O Box	Power control module
	Printer	Photo printer	Dye-sublimation Photo Printer (Model Selectable)
Housing	Stand	Dimensions : (W) 750 x (D) 550 x (H) 1926 mm	
		Weight : Approx. 110kg (including internal components)	
		Material : Steel (EGI)	
		Color : Standard white (optional)	
S/W	Operating System	Windows	Win10 / Win11
	Program	Photo Q	Proprietary program / Admin page provided
	Communication	For server connection	Q2 Control

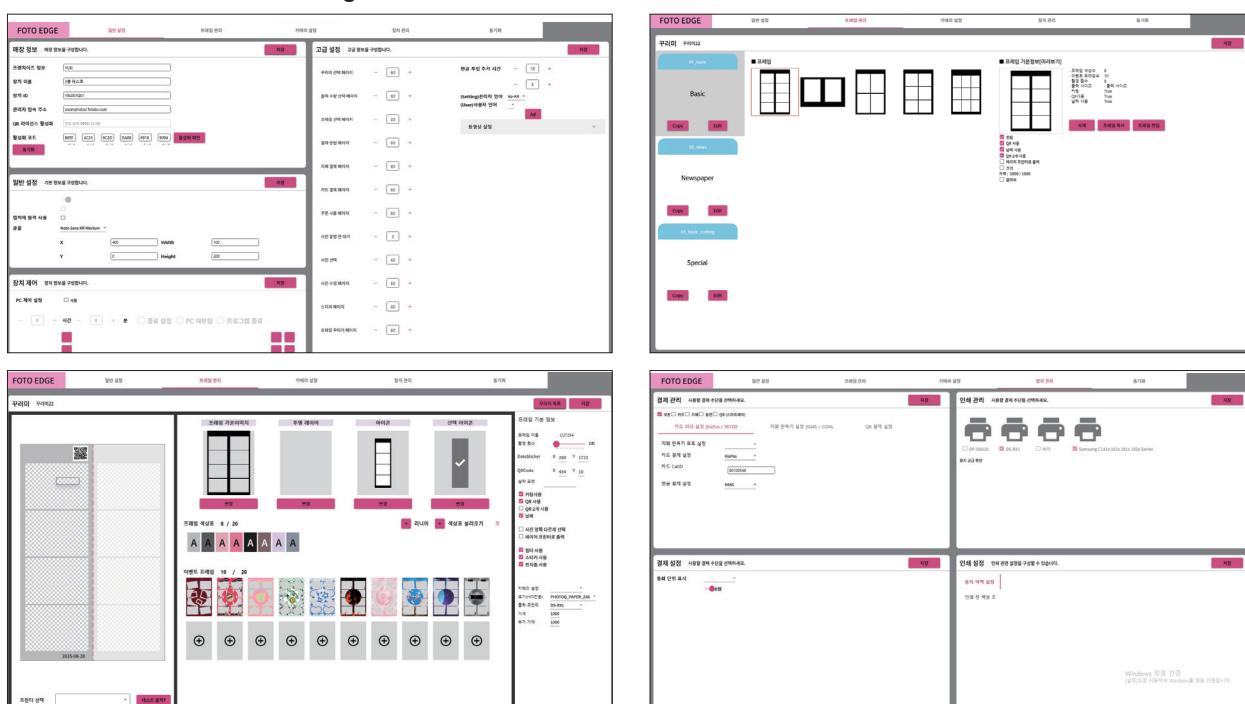

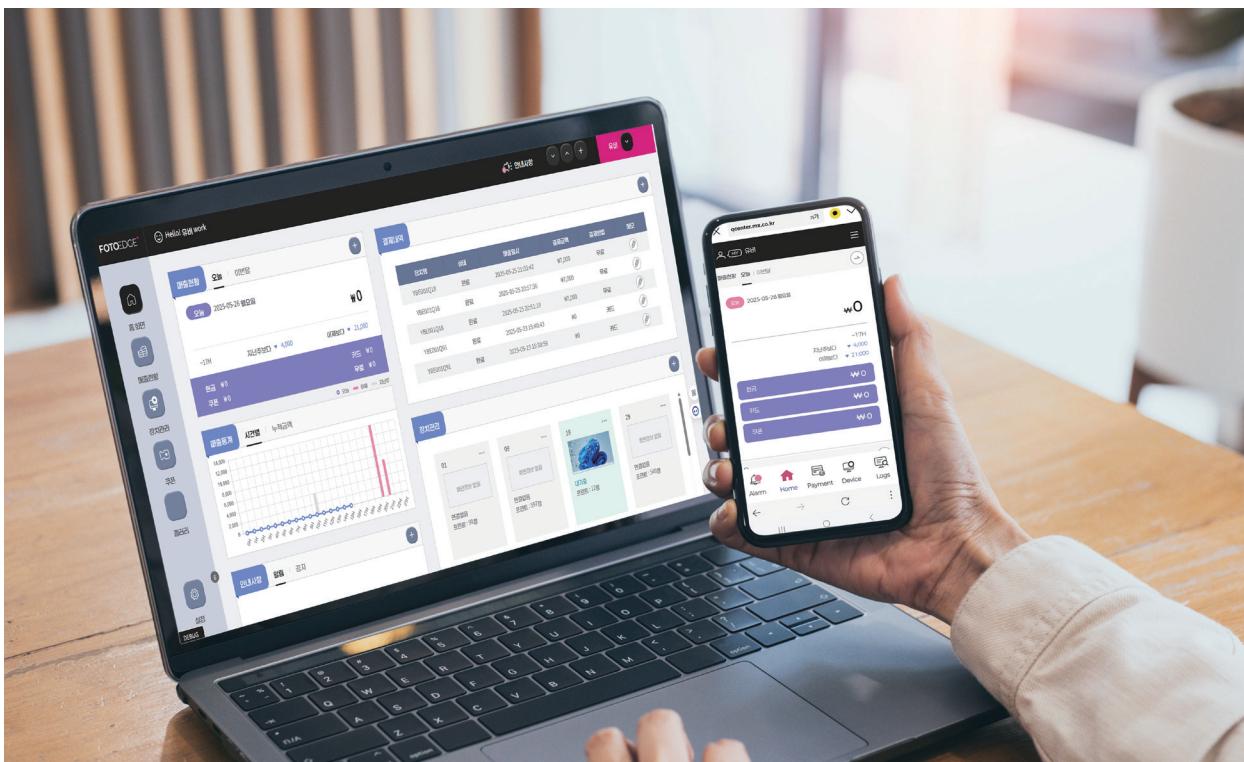

PHOTO KIOSK / BOOTH ALL-IN-ONE DIGITAL SOLUTION

PhotoQ software by Ubi Co., Ltd. is a solution that combines cutting-edge technology with innovative features, presenting a new paradigm for photo booths and photo kiosks.

Management Program for Franchise Owners (Stores)

- Check real-time sales and statistics
- Remote control and real-time device error alerts
- Provides paper replacement timing prediction
- Device screen monitoring
- Device log monitoring

Dedicated Management Program for Chain Business Division

- Check real-time sales and statistics by franchise and determine rankings
- Manage sales, statistics, and settlements
- Manage coupons, advertisements, and store policies

De

- 3-level access control
- Automatic fee calculation
- Continuous server monitoring
- Technical support and remote service
- Consulting and improvement work
- Brand-specific customization provided

Point

PHOTO KIOSK PRODUCTION PROCESS

Software design & Development

We are undergoing a systematic and innovative software design and development process to operate a stable photo kiosk that meets customer requirements:

1. Analysis of customer requirements and planning
2. System architecture and module design
3. Cloud server integration design
4. Application of design requirements
5. Development and programming
6. Testing and quality assurance

Hardware Design and Production

To meet the diverse needs of our customers, we follow a systematic and precise hardware design and production process to manufacture highly reliable photo kiosks:

1. Planning and analysis of customer requirements
2. Hardware architecture design
3. Component selection
4. Production and assembly
5. Testing and inspection

Server and System Operations

To ensure stable and efficient operation of our photo kiosks, we establish independent cloud servers:

1. Database setup
2. System operation and management
3. Security management
4. System updates
5. Data analysis and reporting

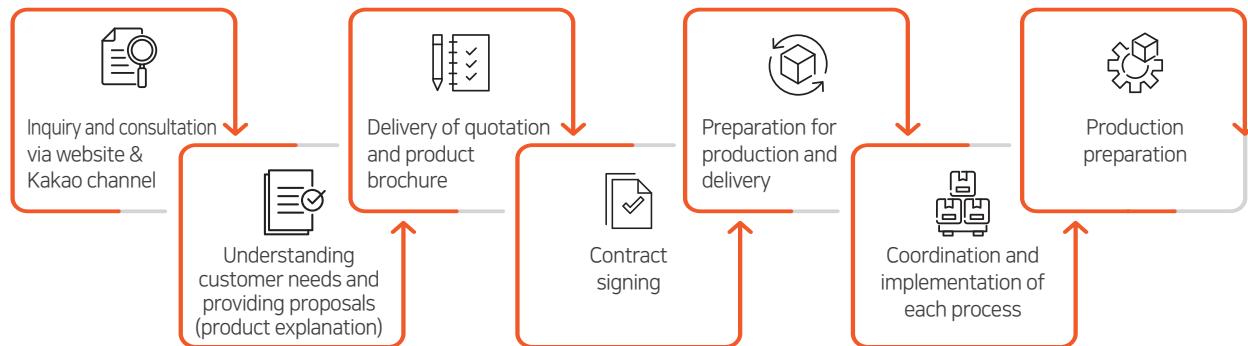

Pre-Delivery Testing

UBI's photo kiosks undergo five rigorous testing stages before production and delivery to ensure the highest quality and reliability:

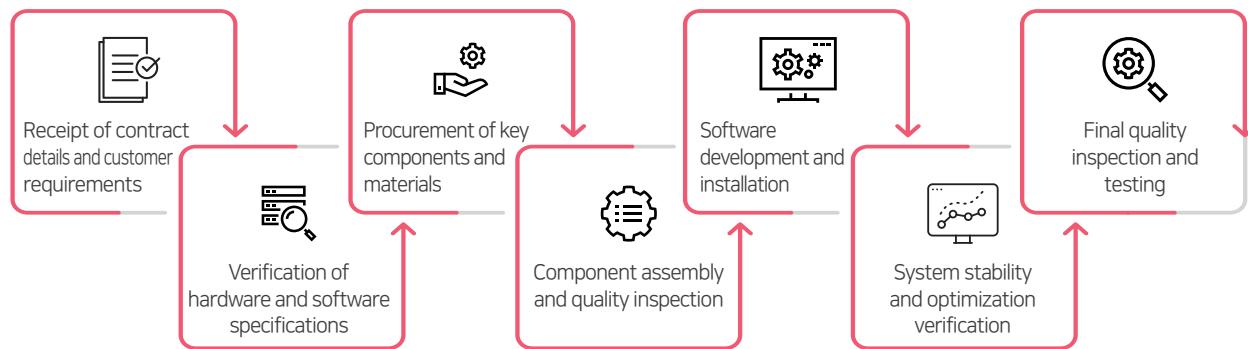

1. Hardware inspection
2. Software and functionality testing
3. Durability testing
4. Compatibility and network testing
5. Final quality verification
